Pendant with Rutil Quartz - Hans Przyrembel, 1928

This pendant was reconstructed from a photograph dated 1928. The strokes shaped inclusions of the rutil quartz cut the concentric rings, making up the circular form of this piece of jewelry. We have in our possession photos from Przyrembel, showing a different version of this pendant, however, none of the pendants exist.

Dia: 1.17"

Au: 37 g 18 Karat (750)

Rutil Quartz: 0.12mm

Edition of 25
