Candlestick with Rose Quartz - Josef Hoffmann, circa 1910

Matching the vase, we also produce a set of candle sticks. The original form has not been altered, the proportions simply diminished in relation. For this reason, the candle holder and the base are to be loosely fitted to the main part. On the other hand, the two additional loose parts are essential for the stability and the function. The body and the base of the candle stick are made of silver, the feet of rose quartz balls and the candle holder of brass, silver plated.

H: 3.7"

Dia: 3.9"
