Tea Globe - Wolfgang Tümpel, 1924

This tea globe is produced from Tümpel's original drawing. It consists of two semi globes. The ball contains enough tea for one glass, so everyone can brew his or her tea according to individual taste and preference. The handle is turned hard synthetic material.

Tea Globe Holder - Wilhelm Wagenfeld, 1924

One of the main tasks of the Bauhaus work shop was to design and produce utensils for the preparation of tea. During the years 1923-25 each member of the metal work shop contributed at least one object to this product range. We have chosen to reproduce the tea globe holder from Wilhelm Wagenfeld. Produced in series for the first time.
