Egg Cups with Pillar Feet, circa 1930

The original egg cup was an early design in bakelite, made to facilitate production using synthetic materials. The design dates circa 1930, but the designer is unknown to us. The model, which we have, was no doubt cast, so it posed no problems to make a mould for our reproductions of sterling silver.

Dia: 1,76"
Ag: 54g (925)
Edition of 600
